

Halo Kiosk

The Halo has been designed to reflect the 10 Squared commitment to both form & function. Its stylish free standing design is suited to a number of different environments where it can be installed quickly and easily, its small foot print allowing it to fit seamlessly into any business, even when space is limited.

Features

With the ability to house chip and pin devices, receipt printers, barcode scanners and RFID readers, the versatile Halo can be used for automatic check-in, payment, tickets collection and as an ordering point. It contains an 18.5 inch Projected Capacitive touch screen and industrial PC ensuring the unit is suitable to prolonged hours of use in harsh public realm environments.

The materials and flush surfaces of the Halo make it easily cleanable and thus an ideal solution for environments where hygiene is paramount.

Construction

Manufactured from aluminum and powder coated to a RAL colour of your choice, The Halo can be branded by means of engraving or the application of digitally printed vinyl.

The on board PC is hand built using selected industrial components ensuring longevity and can be fully and efficiently supported if necessary.
